

⇒ We cannot submit the form is one or both fields are not filled!

A screenshot of a web browser window at localhost:3000. The page has a title "American football". Below the title, there are two input fields: "team X" and "team Y". The "team X" field contains the number "6". Below the input fields, there is a red error message that says "Please fill the form !". At the bottom of the form, there is a black button with the text "Ask possibility to API".

⇒ Loading indicator:

A Loading indicator is displayed, (we submit large values in the form! For example)

A screenshot of a web browser window showing the same "American football" form. The input fields are now empty. In the center of the form, there is a large, light gray circular loading indicator (a spinner) with a black arc at the bottom, indicating that the application is loading or processing data.

⇒ Once we have the result, we display them as shown in the following :

[illegible]

Two buttons, next and previous to switch between pages!

⇒ If one of the scores, exceeds the API limit, we display an error:

A screenshot of a web browser window. The top part of the browser has a grey header with the text "American football" in bold black font. Below the header, there is a large, faint, light grey circular loading spinner. In the center of the browser window, there is a white rectangular error message box with rounded corners. The message box contains a globe icon followed by the text "localhost:3000", the text "Some Error happend !", and a blue button with the text "OK".
